Block-length distributions (neutral blocks and each session’s final block excluded)

Detected block length

Transition-aligned block length

All subjects, all sessions
Blocks at each length (%)

Short block (n=64, mean=24.86 ± 0.23 SEM, median=25)
Long block (n=61, mean=25.02 ± 0.28 SEM, median=25)

Short block (n=64, mean=25.03 ± 0.24 SEM, median=25)
Long block (n=61, mean=24.80 ± 0.29 SEM, median=25)

Blocks at each length (%)

MC06
Blocks at each length (%)

MC07
Blocks at each length (%)

MC08
Blocks at each length (%)

Short block (n=0, mean=nan ± nan SEM, median=nan)
Long block (n=0, mean=nan ± nan SEM, median=nan)

Block length (trials)

Transition-aligned boundary: move backward over consecutive rare trials immediately before each recorded switch.
