Block-length distributions (neutral blocks and each session’s final block excluded)

Detected block length

Transition-aligned block length

All subjects, all sessions
Blocks at each length (%)

Short block (n=20, mean=25.05 ± 0.49 SEM, median=25)
Long block (n=20, mean=25.20 ± 0.48 SEM, median=25)

Short block (n=20, mean=24.55 ± 0.52 SEM, median=24)
Long block (n=20, mean=25.60 ± 0.49 SEM, median=25.5)

Blocks at each length (%)

MC06
Blocks at each length (%)

MC07
Blocks at each length (%)

MC08
Blocks at each length (%)

Short block (n=0, mean=nan ± nan SEM, median=nan)
Long block (n=0, mean=nan ± nan SEM, median=nan)

Block length (trials)

Transition-aligned boundary: move backward over consecutive rare trials immediately before each recorded switch.
