Block-length distributions (neutral blocks and each session’s final block excluded)

Detected block length

Transition-aligned block length

All subjects, all sessions
Blocks at each length (%)

Short block (n=5, mean=24.00 ± 0.71 SEM, median=24)
Long block (n=4, mean=24.25 ± 0.48 SEM, median=24.5)

Short block (n=5, mean=24.60 ± 0.68 SEM, median=25)
Long block (n=4, mean=23.50 ± 0.29 SEM, median=23.5)

Blocks at each length (%)

MC06
Blocks at each length (%)

MC07
Blocks at each length (%)

MC08
Blocks at each length (%)

Short block (n=0, mean=nan ± nan SEM, median=nan)
Long block (n=0, mean=nan ± nan SEM, median=nan)

Block length (trials)

Transition-aligned boundary: move backward over consecutive rare trials immediately before each recorded switch.
